Acanto[®] Onmira active Fungicide

11th March 2020

HAZARD CLASSIFICATION: 9.1A, 9.2B

WARNING - ECOTOXIC

Very toxic to aquatic organisms. Toxic to the soil environment.

APPROVED HANDLER

This product must be under the control of an approved handler during use. Use of this product in any manner contrary to this label may be an offence under the HSNO Act.

RECORD KEEPING

Records of use, as described in NZS 8409 - Management of Agrichemicals must be kept if 3 L or more is applied within 24 hours in a place where the substance is likely to enter air or water and leave the place.

PRECAUTIONS

PRECAUTIONS Keep out of reach of children. When handling, mixing or applying wear protective clothing, including face shield, waterproof gloves and footwear. Avoid skin and eye contact and inhalation of spray mist. Wash splashes of concentrate from eyes or skin immediately. DO NOT eat, drink or smoke while using. Wash hands and face before eating, drinking or smoking and after work. Store in original container, tightly closed, away from foodstuffs. DO NOT store near food, fertilisers or seeds. DO NOT store with Class 1, 2, 3.2, 4 or 5 substances. Stores containing more than 100 L of Acanto® require secondary containment and are subject to signage. (See Safety Data Sheet for further information). Stored appropriately, this product should show no significant degradation for 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this. DO NOT carry more than 5 L of Acanto® on a passenger service vehicle.

SPILLAGE

Wear suitable protective clothing including face shield, impervious gloves and boots. Prevent the product or spilled material from entering water bodies. Absorb liquid spills with inert material such as earth or sand and place in waste containers. Wash area with water and absorb with further inert material. Dispose of safely.

DISPOSAL

Container disposal: Triple rinse empty container and add rinsate to spray tank. If recycling, replace cap and return clean containers to recycler or designated collection point. Alternatively, burn in an appropriate incinerator, if circumstances such as wind direction permit. Otherwise crush or puncture and bury in an approved landfill. DO NOT reuse container. Dispose of product by using according to label instructions. Always follow local authority requirements.

FIRST AID

If swallowed DO NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor if feeling unwell. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to mouth. Obtain medical attention. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If concentrate or spray solution enters the eyes wash out immediately with water. If inhaled move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped.

Acanto® Onmira active Fungicide

11th March 2020

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet.

GENERAL INSTRUCTIONS

Acanto® fungicide is a broad-spectrum fungicide from the strobilurin group with systemic, translaminar, vapour activity, protectant and early curative properties. It is rainfast in 2 hours. Acanto® fungicide is best used as a protective treatment during early crop development. It enhances green leaf area retention and will generally provide about 4 to 6 weeks disease control. Acanto® fungicide should not affect beneficial species including Parasitic Wasps, Hover Flies, Lacewings and Honeybees.

DIRECTIONS FOR USE

It is an offence to use this product on animals.

CROP	DISEASE	RATE	CRITICAL COMMENTS
Barley	Leaf Rust, Net Blotch (spot and net form), Powdery Mildew, Scald	500 mL/ha	Apply as a preventative treatment or at first sign of disease, ideally at GS30 (beginning first node) and again at GS39 (flag leaf emergence) if conditions favour disease, however, later applications can still provide beneficial disease control (up to GS69).
Wheat	Leaf Rust, Powdery Mildew, Speckled Leaf Blotch, Stripe Rust	500 – 750 mL/ha	Apply as a preventative treatment or at first sign of disease from GS30 (beginning first node). A follow-up application may be required 4 - 6 weeks later (up to GS69). Use the higher rate where Speckled Leaf Blotch pressure is high.
	Glume Blotch	500 mL/ha	For protection of the flag leaf apply as a preventative spray from flag leaf emergence (GS39 - 55). For protection of the seed head apply after ear emergence (GS 57 - 69).
Triticale	Leaf Rust		Apply as a preventative treatment or at first sign of disease from GS30 (beginning first node). A follow-up application may be required 4 - 6 weeks later (up to GS69).

Acanto® Onmira active Fungicide

11th March 2020

WITHHOLDING PERIODS:

Wheat, Barley and Triticale (grain): 35 days

DO NOT graze Wheat, Barley and Triticale straw or stubble for 35 days after treatment.

DO NOT graze Wheat, Barley and Triticale green feed or silage for 28 days after treatment.

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds

MIXING

Half-fill the spray tank with clean water and start agitation. Shake the closed Acanto® fungicide container. Whilst filling the remainder of the spray tank add the required amount of Acanto® fungicide, adding any tank mix products last. Maintain agitation until spraying is complete. **DO NOT** leave the spray mix in the sprayer for long periods such as a meal break's or overnight.

APPLICATION

Use 200 litres/ha of water by ground. Use higher water volumes 250 to 300 litres/ha in dense or advanced crops. Use not less than 50 litres/ha for aerial application. As there are many factors involved in aerial application, for optimum results, contact your local Corteva representative for detailed information. Uniform coverage is essential for best results. Wetting agent additives are not normally required when using Acanto® fungicide.

COMPATIBILITY

Acanto® fungicide is compatible with most commonly used insecticides and fungicides. Before using any tank mixture, consult and comply with the recommendations of the partner product. Each product should be added separately to the bulk of the water in the spray tank whilst filling and agitator working.

RESISTANCE MANAGEMENT

GROUP	11	FUNGICIDE
-------	----	-----------

Disease control may be reduced if strains of pathogens less sensitive to Acanto® Onmira® active Fungicide and related strobilurin products develop. To minimise this risk use strictly in accordance with the label instructions. Use a maximum of two applications of Acanto® fungicide or any other strobilurin fungicide per crop per season. Always apply in a mixture with a fungicide from a different chemical group.

NOTICE

Important: You must read the warning and conditions given on this label. If they are not acceptable, or if you are in doubt as to the proper handling of this product (including its transport, storage, use, disposal, and requirements for approved handlers [if applicable]) then return the unopened product to the supplier at once.
